Summary

I am a goal oriented professional with years of experience in complex servers architecture, apps and systems implementation with a focus on high availability and performance.

Certified as a Solutions Architect by Amazon AWS and learned at DevOps Experts college.

I gained experience in using relevant tools to perform full CI / CD processes, configuration management and container architecture.

I am looking for new opportunities in a role that will leverage my specialized DevOps skills. I am a quick learner, team player with great communication skills and a passion for new challenges.
